### Fisher Auto Parts Selects IntelliChief for Document Management

[IntelliChief, LLC](#), a provider of Paperless Process Management (PPM) solutions for the IBM i enterprise, has announced that [Fisher Auto Parts](#) has selected IntelliChief to raise efficiency across department operations. Fisher Auto Parts is reducing their use of paper while decreasing company costs and document processing time.

"Fisher Auto Parts is excited about the operational efficiencies the IntelliChief product will help bring to our Accounts Payable process," notes Joe Vaughn, chief financial officer of Fisher Auto Parts. "Routine transactions will now flow through the system with minimal touches and the manual filing of thousands of paper documents each month will be eliminated."

"We are looking forward to expanding the use of the IntelliChief product to benefit other processes in the months ahead," he adds.

Fisher Auto Parts' customers focus on the installer and do-it-yourself customer since 1929. Fisher has developed into a dominant regional provider of high-quality, name brand auto parts in 15 states across the United States.

The company is owned by the Fisher family and run by CEO Bo Fisher. Fisher is also the founder of Federated Auto Parts, an automotive programmed distribution group that serves more than 3,800 retail locations. "We're excited to see how Fisher Auto Parts benefits from our advanced IntelliChief Capture Enterprise module," says Michael R. Rooney, IntelliChief vice president of Sales and Marketing.

Through the elimination of paper and the automation of their Accounts Payable process, Fisher Auto Parts expects a return on investment for IntelliChief in less than 12 months. Fisher's IntelliChief solution integrates with their custom, home-grown application, and includes licenses of IntelliChief, Formtastic Checks, and the IntelliChief Capture Enterprise module for OCR/forms processing.

The initial IntelliChief implementation at Fisher includes creating, capturing, processing, approving, and storing documents in their Accounts Payable process.
