## IntelliChief Announces New Website Launch

0

On February 24, 2011, in Hillsborough County, Technology, by Press Release

IntelliChief launches their new Website [www.IntelliChief.com](http://www.IntelliChief.com) to assist in success with IntelliChief Paperless Process Management

February 2011—IntelliChief, the leading provider of Paperless Process Management (PPM) solutions for the IBM i (System i, iSeries, AS/400) Enterprise, today announced the launch of their newly designed Website ([www.intellichief.com](http://www.intellichief.com)). The new Site makes it easier than ever to learn about Paperless Process Management (PPM) and all the benefits of going paperless.

The IntelliChief Website has undergone a design and content renewal, featuring improved navigation, and greater accessibility to popular IntelliChief resources, such as: "A Complete Guide to Going Paperless"; "Paperless Process Management"; "Paperless Accounts Payable"; and "Paperless Human Resources."

"We are confident that our customers and partners will find their experience on IntelliChief.com to be greatly improved," said Brian Smith, Director of Marketing at IntelliChief.

Case studies detailing the benefits IntelliChief customers have realized through IntelliChief Paperless Process Management solutions and various whitepapers are available for download now at [www.IntelliChief.com](http://www.IntelliChief.com). Site visitors will also learn how IntelliChief solutions are tailored to benefit Accounts Payable and Accounts Receivable Departments, Human Resources, Customer Service and can be customized to benefit any other department wanting to go paperless.

### About IntelliChief

IntelliChief, is the leading provider of Paperless Process Management (PPM) solutions for the IBM i (System i, iSeries, AS/400) Enterprise. With decades of expertise in the market and seamless integration with leading ERP software vendors, IntelliChief takes companies of all sizes paperless with a typical ROI of less than 8 months. Users can create, capture, manage, archive, retrieve, and distribute mission-critical documents directly from their familiar ERP screens, eliminating the need for filing cabinets, storage facilities, fax machines, copiers, and paper files.
