IntelliChief Analytics

What Is IntelliChief Analytics?

IntelliChief Analytics provides you with end-to-end visibility of every document that enters your organization. From the moment a document is captured, you can track it through automated workflow cycles, enabling informed decisions to be made at every level. Designed for the enterprise, IntelliChief Analytics is a flexible solution that helps you cut costs, bolster cash flow, and eliminate operational inefficiencies across every department.

94% of business professionals say data and analytics is important to their business growth and digital transformation.

**The 2020 Global State of Enterprise Analytics*

Reliable Visibility, Real-Time Reporting

Business intelligence plays an essential role in enterprise success, but gathering and utilizing this information can be a significant challenge when tracking information across a complex enterprise infrastructure. IntelliChief Analytics features scalable dashboards that deliver convenient self-service analytics reporting, providing you with unrivaled data visualization supported by intuitive drop-and-drag simplicity. All reports may be regularly scheduled, saved, and shared with colleagues for convenient and timely notifications.

IntelliChief Analytics utilizes an array of interactive visualizations, including:

- Heat Maps
- Gauges
- Column Charts
- Line Graphs
- Data Tables
- Cross-Tab Reports
- And More

This versatility provides you with customizable reports formatted to the needs of your enterprise. Drill down on KPIs or outfit your dashboard to reflect your company culture or mission. You can even schedule reports to be shared automatically via email, eliminating the need to prepare and send them yourself. Alternatively, you can export them to Microsoft Excel for distribution.

Do You Know How Your Cash Flows?

Crunching the numbers manually is complex and time-consuming. If your process resembles the picture above, it's time to update your analytics capabilities.

Boost Business Intelligence on Day 1

IntelliChief Analytics features several ready-to-use dashboards and reports to help you monitor:

- System Status
- Single/Batch Documents
- Users/Groups
- Permissions
- DPP Index
- Workflow Routing Groups

They can be categorized by permission level and other parameters to control access while improving decision-making.

IntelliChief Analytics

Analytics for Every Area of the Enterprise

IntelliChief Analytics is a component of IntelliChief ECM, an industry-leading Enterprise Content Management solution that facilitates a smooth, automated transition away from costly manual document management and workflow functions. IntelliChief enables you to capture documentation in any format, index contents, and validate with data in your ERP system or applications to help you manage the life cycle of all related documents and gain control over interdepartmental processes with workflow automation. IntelliChief Analytics helps you verify these operational improvements.

Implement IntelliChief Analytics in any department that relies on a large volume of paper-based documents or transactional content:

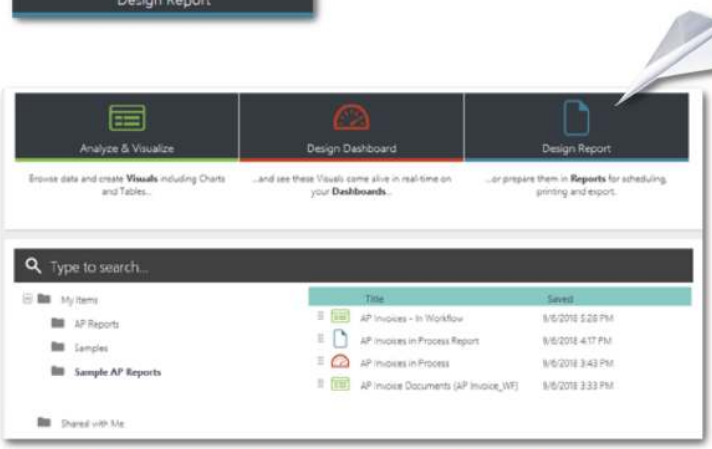
Intuitive Self-Service Reporting

Many reporting opportunities occur on-the-fly. You need a business intelligence solution that is up to the task of keeping your analytics updated in real-time. IntelliChief Analytics offers a wide range of self-service capabilities tailored to your team's needs and roles.

Organize and build your data
Generate charts, tables, graphs

Organize and display your visuals

Customize your report layouts



Create, search, and share analytics reports in only a few clicks.

These self-service capabilities empower you to discover new insights and easily author dashboards and reports without needing to engage IT staff for help. You can visualize data in intuitive ways, create dashboards and reports via a drag-and-drop designer, and easily share and schedule reports from a central interface. From the moment you deploy IntelliChief, your team will unlock new ways to visualize data, and you will benefit from greater accountability across the board.

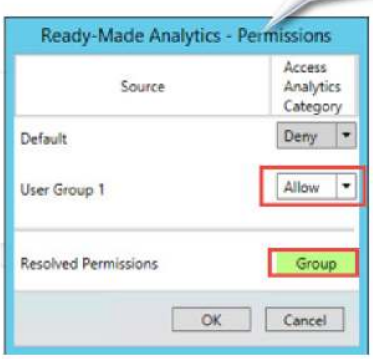
IntelliChief Analytics

Interractive Dashboards, Inclusive Visibility

Publish your most powerful insights in personalized reports. View, interact with, and share visualizations across multiple data sources, projects, and transactions. IntelliChief Analytics helps your team delve deeper into your data to uncover new cost saving opportunities and operaional insights.

It even increases efficiency by providing individualized views of the insights and metrics that are most important to you as well as those you're sharing information with. All report data is continually updated from IntelliChief ECM, ensuring up-to-the-minute accuracy.

Permissions can be granted and retracted to suit your needs.



Virtually to Reality

IntelliChief Analytics makes delivering self-service analytics easy by optimizing data performance and preparation. Analytics data is stored in a secure database that is fed into IntelliChief in real-time to preserve ECM performance. It caches data to boost performance and prepares your data in intuitive ways to keep your reports accessible at all times. You and your team may create, edit, and share dataviews amongst yourselves or in teams.

Best of all, IntelliChief Analytics data is user-friendly and easy to analyze, empowering you to make data-driven decisions. With IntelliChief Analytics, less time is spent preparing data, making more time to analyze it, to quickly uncover insights and influence important decisions. Are you ready to see how much you can save with business intelligence and analytics?
