

FOR IMMEDIATE RELEASE

Order-to-Cash: Transformation Through Automation Webinar

TAMPA, Fla. (March 2026) - IntelliChief hosted a webinar, Order-to-Cash: Transformation Through Automation, on March 31, 2026, at 2 PM EDT. This webinar highlighted the benefits of automating [Customer Service](#) and [Accounts Receivable](#) functions across a single, unified [HyperAutomation](#) platform.

Manual Order-to-Cash (O2C) processes increase delays and errors that undermine cash strategies, endanger customer relationships, and erode competitiveness. This reality can be alleviated with automations deployed across [IntelliChief's HyperAutomation platform](#). Our platform allows enterprises to increase efficiency, eliminate bottlenecks and errors, and empower finance teams with agile cash strategies.

In this webinar, you learned how O2C automation will fully transform your business with:

- Automated Intelligent Capture technology that classifies and extract data from complex customer POs and remittance advice.
- Automated and streamlined order validation, credit approvals, sales order creation, and order confirmations.
- Automated Cash Application that matches incoming payments to open invoices in your ERP, posts payments, and facilitates reconciliation.
- Workflows that enforce compliance with business policies and regulations to reduce risk and liability.
- Real-time visibility into the status of every customer's order, invoice, and payment for better customer service, and powerful financial insights.

Interested professionals can watch the replay of the webinar [here](#).

About IntelliChief

IntelliChief provides a software platform for AI-enabled automation that integrates with enterprise-class ERP systems to eliminate administrative errors and streamline operations for accounts payable, accounts receivable, sales order management, human resources and more. By robotically capturing, validating, entering and processing data directly into an ERP, IntelliChief enables companies to reengineer mission-critical business processes and reduce costs.
