

FOR IMMEDIATE RELEASE

ASCEND 2026 Conference

ORLANDO, FL. (June 2026) - IntelliChief announced details about their participation in the [ASCEND conference 2026](#). IntelliChief will be an exhibitor at the [OATUG ASCEND 2026 Conference](#) conference hosted by the Caribe Royale in Orlando. IntelliChief will be located at booth 620. Check out their booth to fully understand the benefits of their [pre-built EBS integration](#) for business process automation.

We're also presenting a session, EBS AP Automation: Validation-First vs Visibility-First, on June 9, 2026, at 4 PM EDT. In this session, we'll demonstrate how AP automation with a flexible orchestration engine supports both 'Validation-First' and 'Visibility-First' workflows to accomplish your AP automation goals. Here are the two paths for EBS integration:

1. **The Validation-First Path:** Invoices remain in the high-speed orchestration layer until 2-way or 3-way matching, and all business rules are 100% satisfied. Only "Voucher-Ready" data is injected into the EBS Open Payables Interface, ensuring your General Ledger reflects fully validated and matched payables.
2. **The Visibility-First Path:** Invoices are injected into the EBS Open Payables Interface immediately upon capture. Automation auto-applies "Received Holds" where Receivers aren't immediately available, providing Finance with instant accrual visibility for all invoices while automated workflows resolve exceptions and release the holds for payment.

In this session, you'll learn how:

- Automated 'Received Holds' can be configured for instant accruals.
- Flexible workflow rules match your specific audit and accounting goals.
- Advanced EBS integration maintains a 'Clean Core' with the flexibility to choose the integration that achieves your objectives.

- Reporting is configured to deliver the information you need, regardless of the path you choose.

About IntelliChief

IntelliChief provides a software platform for AI-enabled automation that integrates with enterprise-class ERP systems to eliminate administrative errors and streamline operations for accounts payable, accounts receivable, sales order management, human resources and more. By robotically capturing, validating, entering and processing data directly into an ERP, IntelliChief enables companies to reengineer mission-critical business processes and reduce costs.
